Dear Kent Road Parents and Carers,

It has been a very successful semester with the return of many of our much-loved school activities. I congratulate all Kent Road students on their hard work and achievements over the past two terms and I hope everyone has the opportunity to relax and have some fun over the next two weeks of school holidays.

I wish those families who are leaving Kent Road all the very best for the future.

Term Three is going to be an exciting time at Kent Road. We look forward to seeing everyone back at school on Tuesday 19th July.

PERFORMANCE BAND

Congratulations to our school's Performance Band for their outstanding presentation at today's assembly which had everyone up on their feet and dancing to the music. In spite of not being able to rehearse together as a band throughout 2021, these students have continued to develop their skills. Their commitment to practice is showing great results under the guidance of Alex our band conductor. I look forward to hearing them play at other venues in Term Three.

One Year Three student commented – 'that was the best assembly ever!'

SCHOOL NEWS

Year 4 News

This term in the Science unit, 'Food and Fibre', Year 4 students have been exploring farming processes and technology (as seen in last week's newsletter).

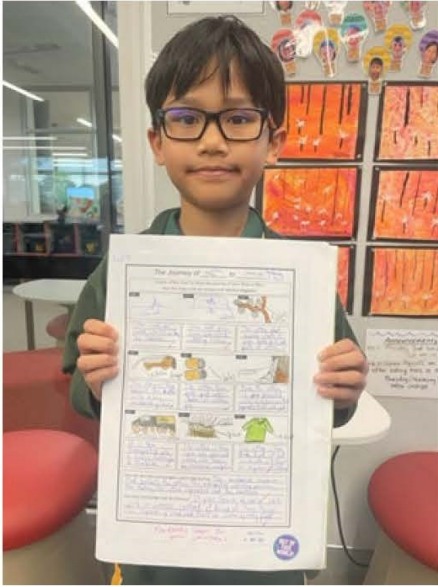

To begin with, students investigated some natural food and fibre products and the journey they take to become a product we can buy in the shops.

Students have also worked in groups to design and make a model of an irrigation system.

Currently, students are working collaboratively to design and create a prototype of a new sustainable technology that will improve farming for the future. Some classes have had the opportunity to present their models to their buddies this week.

It has been a highly engaging unit, enjoyed by both students and teachers.

ROZ the Robot has a button in the middle of his body that the farmer presses to detect the soil health.

This incredible robot checks if the soil is ready to have seeds planted in it.

When the seeds grow, ROZ assesses whether the plants need sunlight or water. Depending on the results, ROZ addresses the plants needs with an inbuilt light that replicates the sun or an inbuilt watering system if the plant is dehydrated.

ROZ is powered through solar panels that are on his back.

ROZ the Robot is the must-have sustainable farming technology of the future.
